Either Julia or I will take care of the web. I can do the Eventbrite for Don. The Administrator signed the FRN. We're just waiting on OPA approval of the listserv.

Cheryl,

Not sure where this stands for today but I may need to sign off around 5:00. Don is out of the office but indicated he may be able to remove the password from the Eventbrite page so it's accessible when everything goes up on the web. Were you publishing the meeting page?

Sorry but after last week, I'm a little confused regarding who's doing what on this one.

Thanks.

Steve

Steve – just got off the phone with Stan...we are going to go forward as is (309 and 310 pages for the internal and public versions, respectively).

Understanding you need something to pass on to folks who may have questions, I propose this language:

Ex. 5 Deliberative Process (DP)

Let me know if that works and if you have any more questions....

Subject: RE: PDFs of the Asbestos RE....public and SACC

Thanks Gino. We'll defer to OPPT but offer two thoughts to consider.

- 1) During the committee's discussions, the reviewers may refer to line and page numbers that will not track with what the public audience has. This will lead to questions.
- 2) In addition, it's possible that some people will see both versions and have questions

If OPPT decides to go with the current files, please prepare a short explanation of the discrepancy (similar to what you've provided below but suitable for public distribution). We will keep that in our files and copy it into email responses should we get questions.

Please let me know OPPT's final decision.

Thanks again.

Subject: RE: PDFs of the Asbestos RE....public and SACC

All:

After spending about 45 minutes I did find one error in the 309 page (internal) one (a difference on p.13....list of Appendix tables not updated in Table of Contents.). After doing that and converting to pdf, the total number of pages was 311; not 310 (like the public version).

After comparing the table of contents with both word versions, there are some minor differences in the line spaces/spacing starting around page 125.

I recommend to not hold up posting the documents and proceed with the ones that are currently on ONE drive because:

- People will be commenting on either the internal or public versions....the two will not be reviewed by the same folks
- The differences are clearly due to formatting/line spacing (and not content).

Thoughts?

All:

Finally...here they are...let me know if you want me to upload onto ONE drive for OSCP.

Sorry they are so late...and thanks to Khoa Nguyen (and his interaction with Keith Jacobs) that solved the PDF problem.

As an FYI and for full discloser – there are no **Error Reference Not Found** and the Table of Contents is fine in both (although appendices titles are bold in TOC), there are few areas like the screen shot below that do exist.....let me know if these are showstoppers
